

## Technical Solution Engineer (m/f/d)

**Location Hanau**  
**Permanent**  
**Full-Time/ Part-Time**

### The following challenges await you:

- › Qualification of sinter pastes at the customer's premises, including new Cu and large-area sinter pastes for SiC and GaN applications for electromobility
- › Assembly and reliability testing of samples, including chips on AMBs or power modules on heat sinks
- › Supporting the customer and production in the event of technical problems
- › Close cooperation with the innovation department in the development of new pastes. Maintenance of machines in the application centre

### Your profile:

- › Degree in electrical engineering, mechanical engineering, materials science, chemistry or a comparable field
- › Relevant professional experience in a comparable position
- › Solid knowledge of assembly and joining technology, sintering pastes, metal-ceramic substrates, power modules and stencil printing
- › Experience with quality methods such as 8D, MSA, FMEA or PPAP
- › Hands-on mentality and proactive way of working
- › Fluency in German and English

### Benefits:

- › Additional benefits - public transport allowance, discounts in many (online) stores, company medical service with comprehensive preventive medical checkups and sports offers
- › Individual development - comprehensive development opportunities and support through training opportunities and internal programs
- › Sustainability as part of the corporate strategy - targeted support for initiatives in the areas of education, family and science through our own foundation
